Akilan Arivazhagan

Enterprise Application Consultant - DevOps Engineer | DevOps
Architecture at State of Tennessee
Franklin, Tennessee, United States

Summary

DevOps and Cloud Architect with 12+ years of experience leading cloud migration, modernization, and automation initiatives across enterprise environments. Proven ability to design and implement secure, scalable, and cost-optimized hybrid cloud architectures, streamline CI/CD delivery, and enhance system reliability through observability and automation.

Experienced in container orchestration, infrastructure as code, and API integration and management across cloud-native ecosystems. Adept at aligning technology with business goals, guiding cross-functional teams, and driving continuous improvement across development and operations.

Awards:

Pat on Back - Years 2014, 2016, 2017 and 2019
Bravo - 2015

Experience

State of Tennessee

Enterprise Application Consultant - DevOps Engineer | DevOps
Architecture
July 2021 - Present (4 years 9 months)

Client: State of Tennessee

- Lead end-to-end DevOps architecture, automation, and cloud modernization for enterprise-scale applications.
- Designed and implemented secure, scalable cloud solutions with cost optimization and high availability.
- Led on-prem to cloud migrations, containerization, and hosting on OpenShift and EKS.
- Automated infrastructure provisioning using Ansible, Terraform, and CloudFormation.

- Developed CI/CD pipelines with Tekton, ArgoCD, and Bamboo for streamlined releases.
- Managed API lifecycle using 3scale and AWS API Gateway.
- Integrated observability and monitoring with OpenTelemetry, Splunk, Jaeger, and CloudWatch.
- Architected and supported enterprise DevOps ecosystems: Ansible application platform, AWX Ansible, Hashicorp vault, Sonatype nexus, JIRA, Bamboo, Bitbucket, Confluence, SonarQube, Jenkins, Docker, and Kubernetes.
- Implemented infrastructure-as-code, automated deployments, and disaster recovery strategies.
- Experienced with RHEL administration, middleware configuration, and scripting (Python, Bash, Java, Ruby, PHP).

Tech Mahindra

8 years 9 months

Software Engineer (Cloud Architect and DevOps Engineer)

March 2018 - July 2021 (3 years 5 months)

Franklin, Tennessee, United States

Client: Nissan North America

- Lead end-to-end DevOps architecture, automation, and cloud modernization for enterprise-scale applications.
- Designed and implemented secure, scalable cloud solutions with cost optimization and high availability.
- Led on-prem to cloud migrations, containerization, and hosting on OpenShift and EKS.
- Automated infrastructure provisioning using Ansible, Terraform, and CloudFormation.
- Developed CI/CD pipelines with Tekton, ArgoCD, and Bamboo for streamlined releases.
- Managed API lifecycle using 3scale and AWS API Gateway.
- Integrated observability and monitoring with OpenTelemetry, Splunk, Jaeger, and CloudWatch.
- Architected and supported enterprise DevOps ecosystems: JIRA, Bamboo, Bitbucket, Jenkins, Chef, Docker, and Kubernetes.
- Implemented infrastructure-as-code, automated deployments, and disaster recovery strategies.
- Experienced with RHEL administration, middleware configuration, and scripting (Python, Bash, Groovy, Java, Perl, Ruby, PHP).

Technologies and tools : Docker, ECS, EKS Kubernetes , API Gateway, Cognito, Aurora postgres, Cloudformation, Terraform, S3, EC2 Autoscaling, Load Balancers, EFS, Managed Kafka services, KMS, Cloudwatch, Jenkins, Codebuild, codedeploy, AppMesh, AWS DMS, VPC, Route53, Chef, Linux, Python, Java, Springboot, Hira, Bamboo, bitbucket, EKS Java, JavaScript, Perl, Ruby, Python, PHP, Groovy, Shell, Bash .

Sr Middleware Administrator/DevOps Engineer

November 2016 - February 2018 (1 year 4 months)

Franklin, Tennessee, United States

Client: Nissan North America

- Developed Chef cookbooks for Linux and middleware automation.
- Automated Spring Boot and JBoss deployments with Jenkins and Bitbucket.
- Managed system patching, filesystem, LDAP, SMTP, and RHEL configurations.
- Supported API management using WSO2 and application monitoring with Splunk and New Relic.
- Provided 24x7 support, performance tuning, and Java application troubleshooting.

Middleware Administrator

July 2016 - November 2016 (5 months)

Chennai, Tamil Nadu

Client: Nissan

- Installed and configured JBoss EAP and Apache httpd for Nissan North America, enhancing application performance.
- Conducted web services migration and application migration from WebLogic to JBoss, ensuring seamless transitions.
- Developed shell scripts for maintenance activities, improving operational efficiency and troubleshooting capabilities.

Middleware Administrator/DevOps Engineer

February 2016 - June 2016 (5 months)

Sunderland, England, United Kingdom

Client: Nissan Europe

- Delivered WebSphere → JBoss migration projects across multiple regions.
- Installed, configured, and optimized JBoss EAP, Apache HTTPD, Fuse, and WSO2 environments.
- Automated deployments using Jenkins and SVN, integrated Logstash for log monitoring.

- Built maintenance and monitoring scripts using Shell scripting.
- Provided performance tuning, heap/thread analysis, and 24x7 on-call support.
- Led training and knowledge transfer sessions for global middleware teams.

Middleware Administrator

July 2015 - January 2016 (7 months)

Chennai, Tamil Nadu

Client: Nissan Europe

- Managed the migration of applications from Websphere to Redhat JBoss, ensuring seamless transitions.
- Installed and configured JBoss EAP and Apache httpd to optimize application performance.
- Set up Jenkins and SVN for deployment automation, enhancing operational efficiency.
- Developed Shell Scripts for maintenance activities, streamlining routine tasks.

Middleware Specialist

May 2015 - June 2015 (2 months)

Sunderland, England, United Kingdom

Client: Nissan Europe. NMUK.

- Technical design, plan and migration proposal.
- Proof of concepts.
- Migration plan, Efforts and schedule preparation.
- Solutions and Architectures.

Middleware Administrator

November 2012 - May 2015 (2 years 7 months)

Chennai, Tamil Nadu

- Installed and configured JBoss EAP and Apache httpd for Nissan North America.
- Developed Shell Scripts to streamline maintenance activities and improve efficiency.
- Conducted performance tuning by analyzing threads and heaps, ensuring optimal system performance.
- Provided on-call support and training to teams, enhancing overall operational capabilities.
